Company Summary

Quality Control

Clothing Designer has our own quality team which consists on under our chief quality controller. Our quality team starts to follow up the orders during size set samples process. They proceed pilot cutting approval and organize PP meeting with production unit concern persons after PP samples approved by customer, proceed 1st in line, 2nd & 3rd (depend on order qty) and pre- final inspection before final inspection by our own team or 3rd party or customers representatives.

Our quality team selects production fabric, garments & trims during bulk production for our in house testing to maintain the quality level even though we arrange 3rd party test reports as per customers requirement for their approval to proceed bulk production. Our QC team issue final inspection report with digital photographs details to our customers who does require 3rd party inspection for their review and arrange shipment after customer's approval with supervision of our experience logistic team.
