Company Summary

Styllent Fashion Ltd.

Cutting

To increase the productivity, we are using a highly trained separate cutting unit for necessary execution. We decide to establish a new dimension in the cutting section to make the correct and maximum utilization of the marker with reducing the wastage percentage. We strictly maintain the numbering sticker to avoid shade variation and others faults for each and every pcs.

Garments Unit

For the sewing the reason of taking 8000 RPM increase a wide range need with sufficient productivity and to increase quality with on oil blocking effect that has never been seen before in MX series. For achieving a maximum machine speed of 8000 RPM and stitch length is 0.6mm-0.5mm.

Printing

Printing unit is one of the essential parts of this composite project. We have printing units, which has the production capacity of 1000 pcs per day. We are able to print rubber, pigment flock and plastisol, high-density, gel print, peace screen with and excellent shade and quality.

Styllent Fashion Ltd.

Company Summary

Step Of quality: Styllent Fashion Limited promises for standard class quality “Quality First” it’s our main vision and mission. We are determine to maintain total quality system and “First alter First rectify”.

Knitting: After receiving gray yarn, we check yarn count, yarn twit and thick and thin appearance of yarn. Then we start knitting. After start knitting, we check stitch length and yarn tension, and then we go for bulk knitting. After running knitting, we check 100% machine wise and shift wise gray fabric in 4- point system. Only 4- point system Q.C pass gray fabric sending to dyeing division.

Dyeing: This pledge requires rigorous quality control mechanism backed by-

- Skilled and trained workforce and supervision.
- Use of standard technology and system for quality check at different level.
- Using 4-point system inspection.
- Stringent tolerance limit.
- Ensure shade, GSM, color fastness, spirality etc.

Styllent Fashion Ltd.
